— Open To Relocate

Summary

Skilled Software Engineer with over 4 years of experience in full-stack web development, specializing in building responsive websites and robust applications. Proven success delivering impactful digital solutions in industries such as healthcare, finance, and travel. Adept at developing innovative, scalable, and efficient systems that help businesses achieve their goals. Passionate about clean code, user-focused design, and continuous improvement.

Work Experience

Onenex (Atlas Digi) - YOMA GROUP

June 2024 – Present

Senior Full Stack Developer

- Developed and maintained high-quality web applications and services for **Lender Applications** and **Banking Transaction Applications**, streamlining APIs and improving maintainability.
- Collaborated with cross-functional teams to design and deliver features, enhancing system architecture and functionality.
- Identified and resolved performance bottlenecks, fixed bugs, and optimized overall system performance.

Onenex (Atlas Digi) - YOMA GROUP

July 2022 – May 2024

Junior Full Stack Developer

- Assisted in designing, developing, and maintaining web applications, including **Medical App**, **TheGoodLife**, and internal projects.
- Collaborated with teams to troubleshoot, debug, and upgrade software systems, ensuring stability and reliability.
- Followed best practices in software development and adhered to **Agile methodologies** for efficient delivery.

Freelance

2020 – 2022

Freelance Web Developer

- Developed custom websites and web applications for various clients, managing projects from initial consultation to final deployment.
- Utilized a range of technologies including **PHP**, **JavaScript (React)**, and **WordPress** to meet client requirements.
- Handled all aspects of the development lifecycle, including UI/UX design, back-end logic, and database management.

Technical Skills

Frontend: HTML, CSS, Bootstrap, Tailwind, JavaScript, TypeScript (Vue.js, Nuxt.js, Next.js, React.js, Alpine.js)

Backend: PHP (Laravel, Livewire, Lumen), Node.js (Adonis.js, NestJS, Express.js)

Databases: MySQL, SQLite, PostgreSQL, MongoDB

DevOps

Tools: AWS, Docker, Git (GitHub/GitLab), CI/CD, Sentry

Testing: Pest, PHPUnit

API Technologies: RESTful APIs, GraphQL APIs

LMS Platforms: EdX (Django + Mako + ReactJS), Moodle

Additional Skills: Python (Flask), GoLang (Fiber), Jira, ClickUp (Agile methodologies)

Projects

Yoma Group Employee Payroll System GraphQL — Laravel — Vue.js — MySQL — RESTful API — GET Stream

- Designed and implemented features for calculating **salaries**, **allowances**, and **taxes**.
- Integrated **GraphQL** and **RESTful APIs** using **Laravel** and **Vue.js**.
- Implemented real-time notifications with **GET Stream**.

AYA Banking Transaction System

Node.js — AdonisJS — React.js — TailwindCSS

- Built a system for managing users, merchants, and terminals.
- Created role-based components using **AdonisJS** with a responsive UI using **React.js**.

Learning Management System (Open edX) (Website)

Open edX — Python — Django — Bootstrap

- Designed and maintained a platform for course delivery and progress tracking.
- Used Open edX features for scalable online education.

Synpitarn (Website)

Laravel — Node.js — NestJS — Vue.js — MySQL

- Developed a loan management system tailored for Thailand.
- Implemented logic for repayment, interest, and scheduling.

HEAL – Medical App (Website)

Laravel — Vue.js — Nuxt.js — MySQL — RESTful API

- Developed systems for appointments, doctor-patient communication, and patient records.
- Built a PWA using **Nuxt.js**.

Buy Balloon Packages – Balloons Over Bagan (Website) HTML — CSS — JS — Bootstrap — jQuery — PHP — Laravel

- Created an e-commerce booking platform for balloon rides.
- Integrated booking and payment systems with Laravel backend.

Leadership

Founder – Haru Learning (Japanese Platform)

Jun 2018 – Present

- Founded a platform for learning **Japanese**, focusing on accessible, interactive lessons.
- Taught and mentored over **100 students**, blending language learning with digital skills.
- Continuously improved curriculum using computing expertise.

Education

University of The People

Bachelor of Computer Science

Expected Graduation: July 2026

- Relevant Courses: Software Engineering Practice, Machine Learning, OS, Computer Architecture, Model-Based Programming, Algorithms

Dagon University

Bachelor of Computer Science

2018 – 2021

- Courses: Programming Fundamentals, Data Structures, Networks, Databases, Software Engineering, System Analysis
